MDH Updates Related to Maternal Programs and Forms to the Maryland Prenatal Risk Assessment Form and Enriched Maternity Services Form

Dear MedStar Family Choice Participating Provider:

The Maryland Department of Health recently shared important updates in Transmittal PT41-22 regarding the Maryland Prenatal Risk Assessment (MRPA) and the Enriched Maternity Services (EMS) forms. Both forms have been amended to include key data elements that may help in identifying potential psychosocial and medical risk factors.

These forms contain critical information related to our pregnant members and as such MedStar Family Choice strongly encourages your submission to the Local Health Departments as indicated in the directions on the MPRA and to complete the EMS form to be maintained as part of the member's medical record.

Our case management department will be in receipt of the MPRA and timely submissions of the form will be integral to facilitate care coordination for our pregnant members.

For more information pertaining to the changes to the MPRA and EMS forms which also highlights the newly added data elements within the forms, visit our website at :
